

# **Binding Perfection Workshop – With Sewing Machines**

## **Student Supply List**

Sue Heinz

This class focuses on how to sew a show-quality,  $\frac{1}{4}$ " 'standard' binding. Don't be fooled into thinking this is the 'same old' technique you are used to. This amazing technique works without relying on any pins, clips, gadgets, or calculators! A kit will be provided. It will contain a pre-quilted and squared quilt sandwich to bind along with well-starched, pre-cut binding strips.

After we complete our binding sample, Sue will demonstrate some fun, simple-to-stunning ideas that will take your newly found binding skills to the next level.

### **Sewing Machine Related:**

- Bring your own machine, cleaned and well-oiled. Don't forget your power cord!
- A basic sewing kit.
- Multi-plug power stick and extension cord for your machine.
- $\frac{1}{4}$ " straight-stitch foot – (same foot you use for piecing  $\frac{1}{4}$ " seams).
- Bright green (like spring grass green – or a medium grey) cotton (50 weight) or poly (60 weight) thread. Aurifil, Glide and Isacord brands of thread are all great choices.
- Bobbin filled with the same thread as above.

Bring your own iron (travel-sized are great) and a small ironing pad. No steam needed! Irons will be shared – one iron per every two students, so coordinate with your friends.

### **Notions:**

- One Elmer Tip Set – available from Sue for purchase in class (or at the lecture) for \$5 + tax.
- 4 oz. bottle of Elmer brand, WHITE, Washable School glue. Please do not bring any other brand or color. **Do Not** Purchase Elmer in the gallon size – I'll explain more about that later!
- Large-eyed, size #10 between, hand-sewing needles (or your favorite needle for hand-sewing bindings).
- Note paper, pen, and a pencil.
